Our Sustainability Commitment

At Vrissaki Beach Hotel, we are committed to reducing our environmental impact, supporting biodiversity, and contributing positively to our community. We actively work to reduce greenhouse gas emissions, conserve resources, and protect local endemic species, fauna, and flora through responsible practices and awareness among our stakeholders.

This document covers the period **October 2025 – September 2026**, with comparisons made against the previous reporting period, **October 2024 – September 2025**. It outlines our sustainability efforts and progress towards our environmental goals.

Our sustainability goals for 2026 included reducing greenhouse gas emissions from energy, water and waste by 3%, total meat purchasing by 2%, single-use plastic purchasing by 3%, and water consumption by 3%.

During the current reporting period, total greenhouse gas emissions decreased by 74.45%, exceeding our reduction target. This improvement was partly influenced by the change in our electricity supplier from EAC to BIOLAND and the associated electricity emission factor. In terms of energy consumption, mains electricity and gas decreased by 7.06%, while total energy consumption decreased by 0.85%.

However, some of our targets were not achieved. Total meat purchasing increased by 13.90%, single-use plastic purchasing by 15.05%, and water consumption by 8.58%. Total solid waste also increased by 1.55% compared with the previous reporting period. These results demonstrate progress in certain areas while highlighting where further improvements and focused actions are needed. Through teamwork and continued commitment, we believe meaningful change is possible, whether large or small.

We continue to implement sustainability initiatives across our operations and encourage our guests, staff, and visitors to support our efforts by saving water and energy and minimising waste.

Supporting Our Community

We believe in giving back to our local community through meaningful initiatives. Every year, on the last day of the hotel season, we organise a special lunch for children with special needs from Apostolos Pavlos School in Liopetri, creating memorable experiences for the children and their families.

We also support animal welfare through our reception donation box for the Paralimni Dog Pound Rescue, allowing our guests to contribute to this important cause.

Furthermore, we are proud to support the Cyprus Anti-Cancer Society through our annual fundraising event, which brings together our team, guests, and partners to contribute towards this important cause. Through the dedication and participation of everyone involved, we have raised approximately €6,000 in support of the Society's valuable work in providing care, support, and services to cancer patients and their families.

Staff Involvement and Awareness

Our employees play an important role in achieving our sustainability goals. We encourage staff participation through regular awareness activities, guidance, and training on responsible environmental practices. Topics include saving water and energy, waste separation, reducing food waste, and the responsible use of resources. By involving our team in everyday sustainability efforts, we aim to build a shared sense of responsibility and encourage environmentally conscious practices throughout the hotel.

Respecting People and Human Rights

Vrissaki Beach Hotel is committed to treating everyone with fairness, dignity, and respect. We are dedicated to protecting human rights and safeguarding the welfare of children and young people. Any suspected cases of child exploitation or abuse are reported to the appropriate authorities. Guests, staff, and visitors are also encouraged to raise any concerns directly with the police by calling 23803024.

Through our continued efforts, we aim to create a positive impact on the environment, our community, and everyone who visits us, with sustainability and social responsibility at the heart of our operations.
